# What we do

A wide-angle photograph of a modern, multi-story building with a glass and steel facade. The building features numerous balconies with lush green plants, creating a vertical garden effect. The sky is blue with some clouds.

## Delivering Smart Metering Solutions for Over 50 Years

### A Legacy of Innovation and Customer Focus

For more than five decades, Kimans Metering has been a trusted leader in the design and manufacturing of smart metering solutions. We are committed to empowering our customers with innovative and customizable flow and thermal energy meters that address their unique needs and operational environments.

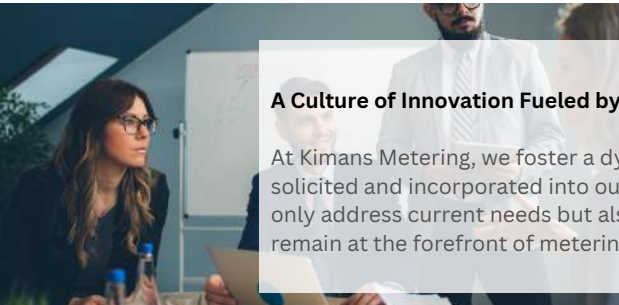

A photograph showing a group of business professionals in a meeting. A man in a suit is gesturing with his hand while speaking to a woman. Other people are visible in the background, some looking at a laptop.

### A Collaborative Partnership for Optimal Performance

We believe in a collaborative approach. Our team of experts partners closely with you throughout the entire process, from initial consultation to implementation. We go beyond simply offering a product; we take the time to understand your specific application, operational needs, and environmental factors. This in-depth analysis allows us to design and manufacture meters that deliver exceptional performance, long-term value, and seamless integration with your existing infrastructure.

### Uncompromising Quality and Global Expertise

Kimans Metering products are built to last. We adhere to rigorous quality standards and testing procedures to ensure exceptional reliability and longevity in even the most demanding conditions. Our global presence allows us to leverage a diverse and talented team with expertise across all aspects of design engineering, manufacturing, and customer support. This ensures we continuously refine and enhance our product offerings to meet the evolving needs of our worldwide clientele.

### A Culture of Innovation Fueled by Customer Feedback

At Kimans Metering, we foster a dynamic environment where customer feedback is actively solicited and incorporated into our ongoing product development cycle. This allows us to not only address current needs but also anticipate future challenges and ensure our solutions remain at the forefront of metering technology.

### Sustainable Solutions for a Sustainable Future

Kimans Metering is dedicated to environmental stewardship. Our innovative and efficient metering solutions play a vital role in preserving the world's most precious resources – water and energy. By providing accurate and reliable data, we empower our clients to optimize resource consumption, saving time and costs while promoting environmental sustainability.

### Leading the Way in Flow and Energy Metering

Our mission is to be a recognized leader in the field of flow and energy metering. We achieve this through unwavering dedication to innovation, a commitment to versatility in our solutions, and an unwavering focus on customer-centricity. We foster an open and collaborative culture where every idea is valued, encouraging continuous exploration and pioneering advancements in metering technology. Ultimately, we are dedicated to helping our clients efficiently account for the world's most vital resources, ensuring a sustainable future for generations to come.

### Precision Engineered for Longevity

Our unwavering commitment to quality is evident in every product we create. Kimans metering solutions are meticulously crafted to endure even the most demanding operational environments. Rigorous testing protocols and the use of premium materials ensure exceptional reliability and longevity.

Beyond superior product quality, Kimans invests heavily in research and development to stay at the forefront of technological advancements. Our global team of experts brings a wealth of knowledge and experience to the design, engineering, and manufacturing process. This collaborative approach fosters innovation and enables us to continually refine our products, ensuring they exceed industry standards and meet the evolving needs of our customers.

By combining precision engineering with a deep understanding of customer requirements, Kimans Metering delivers products that are not only built to last but also designed to optimize performance and efficiency. Our solutions are more than just products; they are a testament to our dedication to quality, innovation, and customer satisfaction.

# HYDRASONIC S8

## Ultrasonic BTU Meters

Hydrasonic S8 ultrasonic BTU meter is designed for measuring the energy consumption in heating/cooling application for billing purpose. Its static ultrasonic technology is based on the measurement of the transit time.

It offers benefits like easy battery & temperature sensor replacement, IP68 protection, no straight run requirements, M-Bus and Wireless M-Bus communication options.

# SVM-21

## Smart M-Bus Isolation Valve

SVM-21 smart valves are battery operated open/close valves for remote disconnection by stopping flow, operating on M-Bus protocol. It comes with software for monitoring & control with error reporting functions and an IP68 protection.

The valve size ranges from DN15 to DN300 and is compatible with all M-Bus masters.

# HYDRAMAG

## Electromagnetic Flow / Energy Meters

The HYDRAMAG is designed to measure the volumetric flow rate of electrically conductive liquids. To ensure accurate readings, the liquid must have a minimum conductivity of 20  $\mu\text{S}/\text{cm}$ .

# HYDRAFLOW

## Ultrasonic Clamp-on Flow / Energy Meter

HYDRAFLOW ultrasonic clamp-on flow and BTU meter is the perfect solution for measuring fluid flow in a wide range of industrial applications. Our ultrasonic flow meter features state-of-the-art technology and is designed to provide highly precise and reliable flow measurements, even in challenging environments.

# HYDRASONIC- i UWM

## Ultrasonic Water Meters

The i-UWM ultrasonic flow meter is designed based on the transit time ultrasonic technology which is suitable for measuring clean water with high accuracy. The UWM with its unique design guarantees the measurement of extremely low flow rates to account for every drop of water. Various communication options allow easy read out of the values.

# SOFTWARE & CONNECTIVITY

Kimans Metering offers advanced software and connectivity solutions that complement our precision metering hardware. Our cutting-edge systems enable seamless data collection, analysis, and management, empowering you to optimize operations and make informed decisions. From data acquisition to comprehensive reporting, our software solutions provide the tools you need to unlock the full potential of your metering investment.
